

NOS ACTION

Environmental conservation and restoration:

Our association works to conserve and restore ecosystems, protect wildlife and preserve natural habitats, thereby contributing to the long-term health and sustainability of the environment.

Sustainable waste management:

We promote the principles of Reduce, Reuse and Recycle to minimize waste generation and encourage responsible waste management practices, thereby reducing the environmental impact linked to their disposal.

Protecting air and water quality:

We implement measures to protect and improve air and water quality, advocating for the reduction of pollution emissions and promoting initiatives that improve the quality and accessibility of water resources.

Renewable energy and sustainable practices:

Actively supports the adoption of renewable energy sources and advocates for sustainable practices such as energy efficiency and responsible consumption to reduce greenhouse gas emissions and combat climate change.

Community engagement and awareness:

We involve and raise awareness among communities, raising awareness of environmental issues, the importance of biodiversity and sustainable living practices. Through community participation and empowerment, we foster a sense of responsibility and encourage positive environmental actions.

CONTACT-US

Please don't hesitate and feel free to contact us at any time - we are here to listen and collaborate."

GREEN DIRECTION

ASSOCIATION

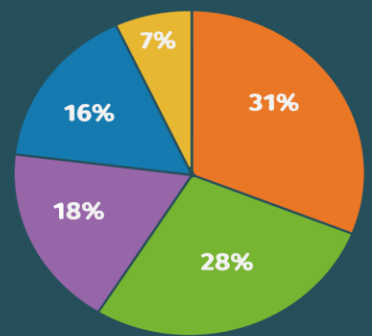

is a non-profit association dedicated to protecting the environment.

Faced with the considerable challenges facing the planet, more and more people want to contribute to protecting the environment.

THE GOOD NEWS is that there are many ways to get involved with Green Direction, depending on your availability, skills, priorities and desires. We need all forms of involvement, whether small or large, to work together and achieve new successes

EMISSIONS BY SECTOR: INDUSTRY AND ELECTRIC POWER GENERATE MORE THAN HALF OF GLOBAL EMISSIONS

- ◆ Transportation
- ◆ Industry
- ◆ Building
- ◆ Electricity
- ◆ Agriculture, land use and landfills

Emissions from the electric power sector accounted for 28% of global emissions, the vast majority of which came from coal combustion. Combined emissions from land use, agriculture and waste accounted for 18%, followed by transport with 16% and buildings with 7% of the global total.

I ACT WITH GREEN DIRECTION

- ✓ "I sign petitions for the future of children. Join us."
- ✓ "Your donation supports our autonomy. Take action."
- ✓ "Understand and act on the climate."
- ✓ "Collaborate online to share our values."
- ✓ "Become a volunteer for the environment."
- ✓ "Discover our educational resources."

We hope you'll join us in Green Direction!

COMMITTEES

"Our association, represented by various committees, is committed to solving pressing environmental and societal issues through targeted expertise and collective action, to foster a sustainable future."
